

Lana Atiya

Philadelphia, PA | lanaati@engineering.upenn.edu | linkedin.com/in/lanaati | github.com/lana-ati

EDUCATION

University of Pennsylvania, GRASP Lab

Philadelphia, PA

Master of Science in Engineering in Robotics

Aug. 2026 – May 2028

- Current Coursework: Machine Learning, Computer Vision & Computational Photography

Technical University of Munich

Munich, Germany

Bachelor of Science in Computer Science

2023 – 2026

- Bachelor Thesis: “Convergence of Heterogeneous Learning Algorithms in Coordination Games”
- Selected for Gems of Informatics, an advanced lecture program in Robotics and Artificial Intelligence
- MINGA Mentor Program - Supporting international students at TUM

EXPERIENCE

CHECK24

Munich, Germany

Software Engineering Intern

Aug. 2025 – Oct. 2025

- Developed and deployed an AI-powered customer feedback summarization feature, integrating backend logic, APIs, and frontend/UI components
- Built and launched a production feature used on CHECK24’s consumer platform

Technical University of Munich (TUM)

Munich, Germany

Teaching Assistant / Tutor

2024 – 2026

- Taught and supported over 120 students in Software Engineering, Introduction to Programming, and Introductory Mathematics for Computer Science

Ray Sono

Munich, Germany

Software Engineering Intern

July 2022

- Redesigned a project and task database using IndexedDB and JavaScript
- Developed an interactive Python application using sensor data and Dash for data visualization

PROJECTS

Convergence of Heterogeneous Learning Algorithms in Coordination Games | *Python*

2026

- Analyzed convergence of coupled learning algorithms combining Multiplicative Weights Update and Projected Gradient Descent in 2×2 and 3×3 coordination games
- Engineered numerical simulations under full-information and noisy feedback to study convergence dynamics and basin boundaries

Hidden Markov Model for Sleep Stage Analysis | *Python, HMMs*

2026

- Implemented a Hidden Markov Model to model sleep-stage transitions from heart-rate and eye-movement observations including filtering, smoothing, prediction, and Viterbi algorithms for probabilistic state estimation

Cache Simulation Project | *C++, SystemC*

2025

- Implemented and evaluated a cache simulator in SystemC, analyzing cache behavior under different configurations and access patterns

Distributed Metadata Service | *Java, gRPC, Protocol Buffers, Gradle*

2025

- Extended a distributed metadata service with new gRPC endpoints for album metadata using Protocol Buffers
- Implemented client-server communication, metadata retrieval, error handling, and service integration in Java

TECHNICAL SKILLS

Programming: Python, C++, C, Java, SQL, RISC-V Assembly, OCaml

ML / Robotics: Machine Learning, Computer Vision, Numerical Simulation

Frameworks & Tools: Git, Docker, React, Spring, JUnit, Maven, Gradle, SystemC, MongoDB

Spoken Languages: English C2, German C2, French B1
